

# Clicks Enterprise

**AI-Powered Commerce Infrastructure for Modern Enterprises**

One unified ecosystem. Built for scale, automation, and global operations.

ENTERPRISE-GRADE

AI-NATIVE INFRASTRUCTURE

GLOBAL SCALE

THE CHALLENGE

# Why Enterprise Commerce Infrastructure Breaks at Scale

## Traditional Enterprise Stack

Fragmented commerce infrastructure

Multiple disconnected systems & platforms

High engineering & developer dependency

Expensive infrastructure maintenance

## Clicks Enterprise Infrastructure

**Unified Platform**

One ecosystem, all ops

**AI-Native Ops**

Automated workflows

**Global Scale**

Multi-region, multi-brand

**Deep Integrations**

ERP, POS, WMS & more

Clicks replaces fragmented stacks with unified AI-native infrastructure.

# Built for Scalable Commerce Operations

## Unified Ecosystem

One platform, all operations

## AI-Native Core

Intelligence in every workflow

## Global Infrastructure

Multi-region, multi-brand

## Enterprise Security

Compliance-ready by design

## Operational Automation

Less engineering dependency

## Centralized Intelligence

Unified analytics layer

# Enterprise Engagement Model

A flexible, usage-based model built around your operational requirements.

## Enterprise Onboarding

**From \$2,500**

Custom infrastructure setup

## Annual Support

**From \$5,000 / year**

Priority support & reliability

## Infrastructure & Usage

**Pay-as-you-go**

Scale with operational growth

## Custom Features

**Scoped pricing**

Tailored integrations & workflows

**Every engagement is structured around your operational requirements — not a fixed pricing tier.**

# Enterprise Onboarding

## Starting from \$2,500

### What's Included

-  Infrastructure setup and environment architecture
-  Platform deployment and configuration
-  Workflow configuration and automation setup
-  ERP, POS, WMS, and payment integrations

### Onboarding Phases

#### Discovery & Scoping

Audit, team mapping, requirements

#### Architecture Design

Environment planning and integration mapping

#### Deployment & Configuration

Setup, automation, and testing

04

#### Go-Live & Stabilization

Launch support and handover

ANNUAL SUPPORT

# Annual Enterprise Support

## Starting from \$5,000 / year

### Support Coverage

#### Priority Technical Support

Direct engineering team access

#### Platform Maintenance

Updates, patches, stability

#### System Monitoring

Proactive health tracking

#### Security Updates

Continuous patching and compliance

### Operational Support

#### Performance Optimization

Ongoing operational efficiency tuning

#### Technical Assistance

Platform and integration support

#### Operational Support

Workflow and automation guidance

#### Quarterly Reviews

Strategic roadmap alignment sessions

# Infrastructure & Usage Billing

Pay-as-you-go operational model

Server Infrastructure

AI Processing

API Usage

Storage

Notifications

Scaling Resources

**Businesses scale infrastructure costs based on actual operational growth.**

CUSTOM DEVELOPMENT

## Custom Features & Integrations

# Scoped and priced based on business requirements

### Custom Capabilities

Custom Workflow Design

ERP Integrations

Custom AI Workflows

Enterprise Feature Dev

### Engagement Approach

Requirements Scoping

Engineering Assessment

Proposal & Timeline

Build & Integration

INCLUDED BY DEFAULT

# Enterprise Commerce Infrastructure

Multi-Store Management

Multi-Warehouse Ops

Advanced Inventory

Enterprise CRM

ERP Integrations

AI Workflow Automation

Omnichannel Ops

Advanced Analytics

White-Label & Branding

# AI-Powered Enterprise Operations

## AI Capabilities

AI Inventory Forecasting

AI Customer Intelligence

AI Marketing Workflows

AI Analytics & Insights

## Intelligent Commerce Orchestration

Data Ingestion

AI Processing

Automated Actions

Continuous Learning

# Infrastructure & Scalability

## Shared Infrastructure

### Cost-Efficient Scaling

Optimized multi-tenant resources

### Fast Deployment

Rapid provisioning and go-live

### Managed Operations

Infrastructure handled by Clicks

## Dedicated Infrastructure

### Isolated Environments

Dedicated compute and storage

### High-Performance Architecture

Optimized for peak workloads

### Enterprise-Grade Reliability

SLA-oriented uptime and availability

### Advanced Scaling

Horizontal and vertical on demand

# Enterprise Integrations

## ERP Systems

SAP, Oracle, NetSuite

## POS Systems

Unified commerce POS

## Payment Gateways

Stripe, Adyen, PayPal

## Logistics Providers

3PL and last-mile

## AI Systems

LLM and ML pipelines

## Custom APIs & Webhooks

Extensible by design

**Built to integrate with existing enterprise operations.**

# Enterprise Security & Governance

## Security Controls

### Role-Based Access Control

Granular team permissions

### Audit Logs

Full compliance audit trail

### Permission Systems

Hierarchical access management

### Infrastructure Isolation

Dedicated secure environments

## Governance Framework

### Compliance-Ready

Built for regulatory requirements

### Operational Visibility

Real-time monitoring & alerting

### Access Governance

Centralized identity management

### Policy Enforcement

Automated compliance controls

# Clicks Enterprise vs. Traditional Commerce Stack

Capability	Traditional Stack	Clicks Enterprise
Architecture	Fragmented, multi-vendor	Unified AI-native platform
AI Integration	Bolt-on, limited	Native to every workflow
Operational Automation	Manual, high dependency	Fully automated operations
Multi-Store Management	Complex, siloed	Centralized, unified
Integration Flexibility	Expensive custom dev	Pre-built + custom APIs
Infrastructure Scaling	Slow, costly upgrades	Elastic, on-demand scaling
Regional Adaptability	Requires separate systems	Built-in multi-region support

The AI-native operating system for enterprise commerce.

# Enterprise Support & Partnership

## Dedicated Support

### Dedicated Account Manager

Your strategic point of contact

### Priority Engineering Support

Direct technical team access

### Infrastructure Consultation

Ongoing architecture guidance

### Migration Assistance

End-to-end transition support

## Strategic Partnership

### Strategic Onboarding

Structured launch with milestones

### Enterprise Success Support

Proactive performance reviews

### Custom Implementation

Tailored workflows for operations

### Roadmap Collaboration

Input into product direction

GET STARTED

Scale Commerce **Without Limits.**

# Enterprise infrastructure designed for the next generation of commerce.

## Global Scale

Multi-region, multi-brand operations

## AI-Native

Intelligence in every workflow

## Enterprise-Grade

Security, governance & reliability
